

**PARTNER OF EXCELLENCE**  
**2020**

## **Beyond Shelter**

**In recognition of your leadership, excellence,  
and innovation in promoting third-party certification  
to the National Green Building Standard (NGBS).**

**Home Innovation Research Labs recognized 87 NGBS Green Partners for outstanding contributions to advancing green building in their communities and their commitment to voluntary, market-driven, third-party certification of high-performance homes. On the heels of reaching the program milestone of 300,000 NGBS Green Certified Homes, we are especially grateful to this year's recipients for helping NGBS Green thrive over such a turbulent time in the world and in our industry. There were individuals or companies recognized in several categories – NGBS Green Verifiers, including some newly-accredited “Rising Stars;” Builders; Multifamily Builders/Developers; Green Advocates; and Architects.**
